## For election slate final for Utah races

By THE ASSOCIATED PRESS

Dan Marriott, a wealthy young businessman with a well-known family name but no political experience, won the Republican nomination Tuesday to oppose

as to begin at 11:59 p.m. EDT Tuesday was reached. The nation's No. 2 is proceeding with preparations for a strike against the economy unless it dragged

### Strike unavoidable

Marriott, 36, who entered the race only five minutes before the filing deadline and before Howe's June 12 arrest on charges of trying to buy sex, won handily over

Hatch, 42, a political newcomer like Marriott, defeated former Asst. Interior Secretary Jack Carlson, 42.

Romney, 52, a cousin of former Michigan Gov. George Romney, was expected to out-poll State Sen. Dixie Leavitt on the basis of his leads in the state's most populous counties and Matheson, 47, on leave as

Howe, twice convicted of soliciting sex from two police decoy prostitutes, passed a

lie detector test on his version of what occurred the night he was arrested, a Salt Lake City television station said Tuesday.

Howe, who has called a news conference for 1:30 p.m. Wednesday on an unrelated subject, was not immediately available. Neither was his attorney and

KUTV said Leonard Harrell, director of the Kessler Polygraphic Institute of Chicago, confirmed that he tested Howe and would be in Salt Lake City Wednesday to deliver results of the polygraph test to Mitchell.

Democratic Sens. Edward M. Kennedy and Hubert Humphrey easily won renomination in Massachusetts and Minnesota on Tuesday, and New Hampshire's outspoken conservative Gov. Meldrin Thomson turned back a Republican challenge in his state as

Daniel Patrick Moynihan held a narrow lead over Bella Abzug in a race Tuesday between two of the more flamboyant politicians in America for the Democratic

With nearly half the vote counted in New York's key primary race, Moynihan, the former ambassador to the United Nations, had an edge of about 6,000 votes, or 36 per cent to 34 per cent over Mrs. Abzug, the congresswoman who traded in her floppy hats for a less colorful image during the

Former Atty. Gen. Ramsey Clark, New York City Council President Paul O'Dwyer and businessman Abe Hirschfeld trailed far behind in the race to oppose Sen. James Buckley. Buckley easily defeated Rep. Peter

Peyster and won the Republican nomination to go with the Conservative party endorsement he had already.

This is how the other races stacked up on a day in which there were primaries for statewide office in 12 states, where a generally light turnout was estimated at

NEW HAMPSHIRE: Outspoken conservative Gov. Meldrin Thomson ran away from moderate Republican Gerard Zeiler to win nomination for a third term. On the Democratic side, Harry V. Spanos, a former state senate leader, was ahead in a

And in a Republican Congressional primary, John Adams, an unemployed 61-year-old taxi driver who did little campaigning, held a lead over favored

RHODE ISLAND: With more than three quarters of the vote counted, controversial Democratic Gov. Philip Noel held a lead of about 2,300 votes over auto dealer Richard P. Lorber in the race for a Senate nomination to succeed the retiring John O. Pastore.

VERMONT: Gov. Thomas P. Salmon was locked in a close race for the Democratic Senate nomination with Scott Skinner, former director of a public interest group.

NORTH CAROLINA: Howard Lee, the former mayor of Chapel Hill, failed in his bid to become the first black elected to statewide office. He was defeated in the Democratic runoff for lieutenant governor by James Green, speaker of the State House.

The primary elections in Utah produced some unusual signs, such as this one, in Provo Tuesday.

## October chosen for more debates

WASHINGTON (AP) — The second and third debates between President Ford and Democrat Jimmy Carter will be Oct. 6 and 22 with the single debate between the vice presidential candidates sandwiched in between, the sponsoring League of Women Voters announced today.

The league said the debate between Republican vice presidential candidate Bob Dole and Democrat Walter Mondale has been tentatively set for the week of Oct. 11, but that no date has been agreed upon.

The locations and other details of the debates are still being worked out, the league said.

The first Ford-Carter confrontation will take place in Philadelphia on Sept. 23, a Thursday. Jim Karayn, project director for the League's education fund which is sponsoring the debates, said the arrangements had been worked out in meetings with the national networks which will broadcast the debates live on television and radio.

The length of the debates has not been settled, but all will begin at 9:30 p.m. EDT, regardless of length, Karayn said.

The subject of the first debate in Philadelphia's historic Walnut Street Theater will be economics and domestic policy. One of the others is expected to deal with foreign policy and national defense, with the third open to a variety of issues.

## Swine flu vaccinations available next month

By NANCY HINSDALE  
Universe Staff Writer

Sometime next month, the nationwide swine flu immunization program will come to BYU according to Dr. Cloyd C. Hofheins, director of the Student Health Center.

The Utah State Division of Health has made a tentative schedule to distribute the vaccine during the first week in October, after receiving it from the center for Disease Control. It says all physicians will receive the vaccine free of charge.

President Ford pushed passage of a bill for the federally-funded program, plans to protect all Americans age 18 and over from a A-New Jersey vaccine, commonly known as the "swine flu" virus.

Despite extensive publicity and haunting statistics of the 1918 epidemic which killed thousands, there is not cause for panic or alarm, says Dr. Hofheins.

"It is not a killer disease," he said. "Except to the high-risk group — and we've already encouraged them to get immunized early." The high-risk group includes those with heart or lung disease, and those with chronic metabolic diseases. These people are encouraged to get immunized as soon as possible, not only to guard against the A-New Jersey strain, but also the A-Victoria and in certain cases the B-Hong Kong influenzas.

The Health Center will continue its normal yearly program with all students able to be immunized against those strains that have been more common in recent years.

Healthy students wishing to guard against the swine flu virus will have to wait for a couple of weeks when the vaccine will be given to all BYU full and part-time students, faculty and staff. Times and locations will be posted then, says Dr. Hofheins, who adds that an exact date is unknown.

Drug companies have had difficulty with manufacturing the volume of vaccine needed, which complicated the question of when distribution would take place, he said.

There has been discussion between private medical interests and pharmaceutical firms because a Federal liability law will protect the firms from lawsuits by those with allergic reactions, while private doctors will have to rely on their own insurance. This stipulation was added because drug firms refused to manufacture the vaccine unless they were protected.

There will be no charge for the vaccine to students, nor to any other person who takes advantage of the program, unless it is administered by a physician who require payment of a service charge. The vaccine itself, however, is always free and will be distributed free by public health authorities.

Bad reactions are rare, said Dr.

Hofheins, but those allergic to eggs should definitely not take it. Normal reactions to immunity — a low fever and a few aches and pains for a day or so may occur, but are usually not reason for concern.

Dr. Hofheins adds there is no certainty there will even be a dangerous outbreak of A-New Jersey and the vaccine to be used may prove ineffective against whatever mutant virus may develop.

"We haven't been able to predict what strain of virus will strike us," he added. He said he speculates this year will probably not be any different than other years.

Even if A-New Jersey does spread, he said, it would only cause the average student a couple of days of missed classes. The BYU population is largely healthy, he said.

The reason it was so disastrous in 1918, he said, was that the nation was just emerging from wartime rationing and lacked nutritious diets. Physicians also lacked antibiotics to combat secondary infections, which were often the cause of death. These are not problems today, Dr. Hofheins said. "It's a different era."

## BBB panel in Provo dissolves

By DEBBIE NEWTON  
Universe Staff Writer

After the completion of a three-month trial period the committee studying the need for a Better Business Bureau in Provo has dissolved.

Gordon Bullock, manager of the Provo Chamber of Commerce, said there is a possibility of re-establishing the BBB committee. The decision will be made by the board of directors of the Provo Chamber of Commerce at a meeting today, he said.

Bob Henrie, former ASBYU president, worked with the Chamber of Commerce last year in an attempt to get a BBB established in Provo to relieve pressure for services put on the BYU Ombudsman by the Provo community. Services offered by the Ombudsman are available to BYU students only, according to Kenneth C. Plant, BYU Ombudsman.

Max Hansen, chairman of the committee, said he had recommended to the Chamber of Commerce that it take steps to establish a BBB in Provo. BYU representative Mike Reall, co-chairman of the committee, said the committee found a definite need in the Provo area for a BBB. He said the major problem was a lack of funding. "What we needed was somebody with money," he said. According to Reall, funds to support a BBB come from the board of directors of the committee showed that more than 50 per cent of the businessmen in Provo favored the establishment of a BBB.

000 Ford workers in Canada were placed on layoff within a few days of the UAW, which also represents to workers, had extended its contract Canada Ltd., but parts shortages were quick shutdowns.

Analysts added that a prolonged walkout would force the layoff of another 170,000 to supply firms, and they estimated a result in lost wages estimated at \$100 million in North America.

0,000 auto workers covered by similar other American automakers will remain in a strike settlement at Ford.

### First in years

With the company and union conceded a layoff — was inevitable, neither side would be a lengthy one.

A speedy settlement on a national pact, production could be hampered for months. Local agreements on working negotiated simultaneously, but the pact at that local has been unusually with only 14 of 99 bargaining units so far.

## To face congressional vote

# Tax bill offers \$35 deduction

By JIM LUTHER  
Associated Press Writer

WASHINGTON (AP) — Congressional uncertainty about the strength of the national economy will mean money in the pockets of most Americans.

Congress is expected to extend for another 18 months the antirecession tax cuts that were enacted last year.

Without the extension taxes on virtually every American would rise, with the heaviest burden falling on the poorest families. The economy would be deprived of \$15 billion in consumer spending. Businesses would lose to the tax collector about \$4.5 billion a year that otherwise could be used to create jobs.

Congress is expected to take final action this week on a massive tax-revision bill that includes extension of the individual and business tax cuts as well as numerous other changes in tax law.

Although the economy is clearly on an upswing, Congress fears that ending the tax cuts now might cause an economic tailspin.

Here is how some provisions in the bill would affect typical American families.

### Tax credits given

Every taxpayer could subtract from taxes owed \$35 for himself and each dependent. A family of six, for example, could save \$210 taxes.

There is an alternative for smaller families and single persons. Instead of the \$35-per-person credit, they could reduce their taxes by 2 per cent of their first \$9,000 of income, or a maximum

credit of \$180.

The taxpayer could choose whichever option provides the greater tax saving.

To take advantage of the credit, the taxpayer totals his income, subtracts his deductions and exemptions, computes his taxes, then subtracts the credit from taxes owed.

The individual credit was available, but amounted to only \$30, for 1975, meaning for taxes paid by April 15, 1976. The \$35 credit and the \$180 alternative are effective for returns filed in April 1977 and 1978.

### Standardize vs. itemize

About 60 per cent of taxpayers use a standard deduction when figuring their taxes, meaning they do not itemize deductions for medical expenses, state and local taxes, contributions, etc.

Inflation in recent years has increased the value of itemized deductions but standard deductions remained comparatively low.

The standard deductions were raised last year and the bill would make these changes permanent. Any taxpayer who does not itemize is allowed a \$1,700 minimum deduction if single and \$2,100 if married and filing a joint return, no matter how little he earns.

The maximum standard deduction is 16 per cent of income, but no more than \$2,400 for single persons and \$2,800 for couples.

This means that couples who do not itemize will be allowed to subtract up to \$2,800 from the amount of income subject to tax.

Experts estimate that the higher standard deductions will encourage nine million taxpayers

to switch from itemizing. This would mean fewer calculations — and less chance of error — for the taxpayer and less work for Internal Revenue Service.

To encourage poor families to keep working and stay off the welfare rolls, the 1975 law provided a "work bonus" of up to \$400 a year.

A working family with children is allowed to subtract from taxes owed 10 per cent of the first \$4,000 of earned income. The credit is reduced gradually before disappearing when the family's income hits \$8,000.

The novel part of this credit is that it is payable even to those families that owe no tax. For example, if a qualified family earning \$4,000 had \$1,000 in unreimbursed medical expenses and thus reduced its tax to zero, the government would mail out a check for \$400.

This credit would be extended in the bill through Dec. 31, 1977, meaning it could be claimed on returns filed next spring for 1976 and in the spring of 1978 for the 1977 tax year.

The bill requires, effective with the return for 1976 which taxpayers will file next spring, that the 12 optional tax tables, which cover 12 pages of fine print in present tax instructions, be revised to cover only two pages.

Taxpayers with taxable incomes earnings after all deductions and exemptions have been subtracted of \$20,000 or less will use the tables, regardless of whether deductions are itemized.

Under present law, a taxpayer may use the short-cut method only if his adjusted gross income generally total earnings is \$15,000 or less and he does not itemize deductions.

# Y students challenged to exceed class limits

By SHERI EYRE  
Universe Staff Writer

Dr. Eliot Butler, chairman of the BYU department of chemistry, challenged students to learn for a worthwhile purpose and go beyond simply meeting class requirements.

Speaking at Tuesday's forum assembly, Dr. Butler stated that "an educated person is one who by his or her own initiative and discipline is consciously, vigorously and continuously learning." He pointed out that a person's learning "must be a result of self discipline, not a result of demands and pressures on his character and pride."

Dr. Butler said that in his 20 years of teaching, there have been, without exception, "a few educated people in every freshman class who have received satisfaction from doing more than just meeting requirements—learning because it is good to learn." He explained too, while it is commendable for a student to meet the requirements,

this can only help the student become a trained individual and never a truly educated person.

"Get interested in the subject by meeting the requirements, and then become free by letting that interest carry you beyond the requirements," challenged Dr. Butler. "You can choose to take a class only to get credit or you can choose to change your life. That class may affect your life forever after."

Dr. Butler stressed that a person should not become educated solely for economic or employment purposes. "Much of our effort here is to help you to be educated," he said, "if that effort is successful, your reward will be far greater than any vocational or economic return alone can be. You'll be a changed person. Your life will be different and you will have increased ability and opportunity to serve."

Dr. Butler quoted two statements from prophets concerning education. Brigham Young had said, "We want our

children to grow up intelligently and to walk abreast of the people of any nation. God expects us to do it."

Spencer W. Kimball has said, "We understand, as few people do, that education is a part of being about your father's business."

Dr. Butler emphasized, "A university offers the opportunity and the encouragement to learn and you must decide how you will respond." Stressing the importance of the influence of the home in determining how a student will respond, he said "a student who has a commitment to learning comes from a home where people are trying, where books are known and loved."

"To be educated will enrich one's life and increase one's joy," he said. "To be educated will increase one's humanness and one's respect and love for God's offspring. To be educated will enlarge one's capacity to serve one's maker, and to serve God in the highest calling for a child of God," said Dr. Butler.

### Kissinger in Tanzania on peace effort

DAR ES SALAAM, Tanzania — Secretary of State Henry A. Kissinger arrived here Tuesday night to start an African peace mission. The Tanzanian government said African presidents will press him to declare support for black guerrilla forces fighting white minority regimes.

As Kissinger flew from Switzerland

to Africa for shuttle talks seeking racial peace in southern Africa, reports said police gunfire killed nine persons in the black South African township of Soweto. The deaths brought to 13 the number of lives reported lost in two days of a job boycott by tens of thousands of workers.

### Carter off to head start in campaign

WASHINGTON — President Ford and Democratic challenger Jimmy Carter both are promising that their organizations will campaign in all 50 states, but Carter's planners are off to a head start.

Ford's national headquarters announced details of its field organization Tuesday, including chairmen for its campaign in each of the 50 states. But Carter's organization

has been in place for several weeks, while some of Ford's campaign offices are still largely on paper.

"An organization in the absence of any other organization should be worth two or three or four points," said Carter campaign manager Hamilton Jordan. "I think in a lot of places the race is going to be that close."

Neither candidate has promised to campaign personally in all 50 states.

### UN delays Viet membership decision

UNITED NATIONS, N.Y. — The Security Council agreed Tuesday to postpone debate on U.N. membership

for Vietnam until after the U.S. presidential election in an apparent effort to avoid an American veto.

### Steelworkers get second candidate

CHICAGO — Pledging a return to rank-and-file unionism, United Steelworkers dissident Edward Sadlowski said Monday he will oppose I.W. Abel's chosen successor for president of the 1.4-million-member union.

Sadlowski's opposition to Lloyd McBride, a veteran USW official based in St. Louis and previously the only announced candidate, was expected. The February 1977 election is for a four-year term.

### Psychiatrist examines 2 in Kennedy plot

SPRINGFIELD, Mass. — Two men who met at a Salvation Army dormitory have been examined by a psychiatrist to see if they are mentally competent to stand trial on charges of plotting to kill Sen. Edward M.

Kennedy.

Meanwhile, authorities say they still have not determined whether the alleged plot was anything more than a hoax.

## Upland hunt season will open Saturday

Saturday marks the first day for the upland game hunting season in Utah, according to Ann Criddle, Utah Division of Wildlife Resources secretary.

Small animals such as bird, rabbits and wild turkeys are open in the hunt.

Students who have been living in Utah for 60 days prior to purchasing a hunting license may buy them at reduced resident fees, Miss Criddle said. An upland game permit costs \$6 for Utah residents and \$20 for non-residents.

Duck hunters must purchase a combination or small game license and have that license validated with a federal migratory bird stamp in order to hunt. The stamps are available at any post office she said.

Other hunts in Utah's autumn hunting season include the bull elk season, for which permits are no longer available, and Utah's deer hunt, which will start Oct. 23.

Deer hunt licenses can be purchased at many sporting goods stores or at the wildlife resources office. The Provo office is at 176 East Center St.

Priest for deer hunt permits are \$7 for Utah residents and \$75 for non-residents.

Rules and regulations of the hunt may be obtained at the wildlife office, Miss Criddle said.

## The Daily Universe

The Daily Universe is an official publication of Brigham Young University and is published as a cooperative enterprise of students and faculty. It is produced as a laboratory newspaper in the Department of Communications under the governance of a Management Team and with the counsel of a University-wide Daily Universe Advisory Committee.

The Daily Universe is published Monday through Friday during the Fall and Winter Semesters except during vacation and examination periods. The Daily Universe is published Tuesdays and Thursdays during the Spring and Summer terms.

Opinions expressed in the Daily Universe do not necessarily reflect the views of the student body, faculty, University administration, Board of Trustees, or the Church of Jesus Christ of Latter-day Saints. Subscription prices: \$18.00 per year. Editorial offices: 538 First St. Wilkinson Center. Printer: Brigham Young University Printing Services.

# Bin to aid recycling

DAVID BLAKE  
Staff Writer

money, according to John Plocher, former ASBYU vice president of Organizations and chairman of the project.

The bins, located outside the Smoot Administration Building, the Lee Library, the Wilkinson Center and the Joseph Smith Building will be emptied twice daily by campus organizations. The Intercollegiate Knights will be the first service organization to participate in the project, said Plocher.

"We hope to have a total of 12 bins by the end of this year," said Plocher. "The bins, made by BYU student Carl Haney, cost \$90 each. They are expensive because we wanted them to be durable so they would last a long time and also be aesthetically pleasing."

Last winter semester, a pilot program was initiated by the Organizations Office to test the success of the project. "We had an overwhelming response," said Plocher. "The project, we hope, will do even better this year as soon as people realize what the bins are for."

Service clubs will be in charge of cleaning out the bins two times daily, said Plocher. From there, the papers will be taken to a garage near lower campus and bundled by the organizations. Once a week, a truck driven by Kevin Clyde, president of the Conservation Club, will take the paper to Salt Lake City where a company agreed to pay \$29 per ton.

The money earned by the project will pay for operational costs and the finance clubs that participate. "Our main objective is not to make money but to help the students become environmentally aware. I would ask each individual to deposit their recycling bins for conservation beauty of the school," said Plo

Robert Meeks, a student from Calabasas, Calif., demonstrates how to use the new recycling bins. Campus organizations will take turns removing the papers to be recycled.

## Cable TV will show USAF film series

A series of 30-minute films entitled "Air Force Now" will be broadcast daily over channel 12, the BYU campus cable, starting today at 9 a.m. and 2 p.m., according to Capt. Michael J. Ehlers, assistant professor of aerospace studies.

"Students interested in seeing what is being done with the federal defense dollar will be especially interested in these films," said Capt. Ehlers.

The first film, "The Russian Threat," discusses the Soviet military advances in aircraft and ballistic missiles. "The Russians are constantly growing and advancing in military power," said Capt. Ehlers. "They currently have 1,600 missiles while we have 1,000."

Films throughout the semester will show scenes of the Air Force in action today, according to Ehlers.

## COUGAR CLUB RUSH

The Cougar Club cordially invites those interested in an open house Thursday Sept. 16 5:00 P.M. in the Alumni House. Dress: Coat & Tie.

Dr. Wesley P. Lloyd is hospitalized

## Former dean has operation

A former BYU dean of students is in a La Jolla, Calif., hospital's intensive care unit following cancer surgery Monday, according to his family.

Dr. Wesley P. Lloyd, 72, endured eight hours of surgery to remove a malignant intestinal tumor, his family reported.

Dr. Lloyd entered Scripps Hospital for gallstone surgery, but his physicians suspected cancer as the cause of his sudden illness. The doctors told his family that survival of the operation at his age was unusual.

Dr. Lloyd served as Dean of Students from 1937 to 1960, until his appointment as dean of the BYU Graduate School.

In 1969 he became dean of the Graduate School of Arts and Sciences at the United States International University in California.

## Famous art prints on sale in ELWC

Prints by artists ranging from Rembrandt to Picasso will be on sale in the Wilkinson Center reception hall until Friday according to an arts salesman.

"I'd venture to say we've got the greatest collection of prints in the world," said Ken Bidner, salesman for Waskewich Galleries.

The BYU Bookstore arranged with Waskewich Galleries of New York to come to BYU each year to sell their prints Bidner said.

The large prints measure 18 by 22 1/2 inches and cost, one for \$3, two for \$5 and 3 for \$6. Each additional print costs \$2. The small prints cost less and vary in size.

Bidner said the three most popular prints are Rembrandt's "Philosopher Reading," "Crucifixion" by Salvador Dali, and Vincent Van Gogh's "Starry Nite."

## Pebble stops Viking dig

PASADENA, Calif. (AP) — The Viking 2 robot stands motionless on the red surface of Mars, its quest for life apparently stilled by one small pebble stuck in its scooping claw.

The gray, squat lander, unable to proceed with its most crucial experiment, awaited help from earthbound repairmen 230 million miles away.

After a successful scoop for soil and delivery to three biology experiments, the arm stopped dead in its tracks — one day before it was to get another clump of dirt Monday bound for the organic chemistry probe, the key in the search for life.

While dragging across the rocky surface, the sampler arm apparently picked up a Martian pebble which got stuck in the sampler head's backhoe, project manager James Martin said. The foe is a device on the swiveling head used to dig trenches in the surface.

"We don't know exactly what the problem is," Martin said after announcing that the lander had registered a "no-go" signal, a built-in command that halts the arm when something out of the ordinary occurs.

Martin said a pebble caught in the backhoe would cause the device to stick out in an awkward position and get hung up on the lander's hardware as the sampler arm made its soil-delivery rounds.

Worse, the arm, topped in the one position beyond the sight of the lander's twin cameras.

So scientists said they would first have to order the arm to extend several inches, take a picture of the ailing arm, and check to see if their guess about the pebble is right.

If so, the arm would be ordered back to the surface for another try, and it was hoped the troublesome pebble would fall free.

During Viking 1's early digging expeditions on the Chryse plain, a malfunction developed with its sampler arm. Scientists fixed that malady, a stuck metal pine, by ordering the arm to the surface again, after which the sampler performed properly.

Due to what Martin called "an awkward time in the

communications relay cycle," the second Viking 2 dig attempt cannot take place until next week.

Postponed until then is the critical search for organic materials, carbon-based molecules found in every living thing on earth.

## 'YOU'VE-GOT-A-FRIEND' IS BACK

If you were matched with a friend last winter or summer and want to stay in the program this semester please fill out the blank below and drop it in the provided boxes in the stepdown lounge, ELWC or in the Student Community Services Office, 4th floor, ELWC

Deadline is Thursday, September 16th.

## Lecture series begins today

An alumni lecture series geared to the level of the non-professional

COPIES  
2 1/2c  
KINKO'S  
377-1792

in technical fields, will begin today with the lecture, "Living Neighbors to Nature."

This will be the first presentation in the "Science for the Non-Scientist" section of the lecture. It will be held at 8 p.m. in the

Alumni House, according to Steven Berrett of the Alumni College.

Environment, ecology and man's relationship to plants and animals in the ecosystem will be discussed by Dr. Donald Allred, zoologist; and Dr. Glen Moore, botanist

and range scientist.

A follow-up to Wednesday's discussion will be held Saturday morning in Aspen Grove. Drs. Allred and Moore will show how to "really" see nature and all her wonders Berrett said.

## Fund gun clubs?

WASHINGTON (AP) — A House committee is being asked to approve a controversial plan that would allow the use of federal funds to help private gun clubs build rifle ranges.

## BLUE KEY

Dr. Allen Bergin, professor of psychology, will address us. We invite all men and women to attend this meeting and inform themselves about membership in this honor and service organization. The meeting will be in 379 ELWC tonight at 5 p.m. Contact Bruce Galnraith for further information at 377-0582.

## COLLEGE REPUBLICANS

Our speaker will be Dave Turner, executive director of the Utah Republican Party. His topic will be campaign techniques. Everyone is invited to attend. Bring dues (\$1 for each semester), so we can plan more activities this year. Contact Dennis Olson for information at 375-1885. The meeting will be tonight at 25 JKB at 8 p.m.

## PHI ALPHA THETA

A lecture entitled "Reconstructing the Mormon Kingdom 1900-1930" will be held today in 321 ELWC at 4 p.m. Dr. Thomas Alexander will be the guest speaker. All are welcome to attend. This is the first of our monthly guest lecture series.

## Y club activities: open house, film guest lecturers

### RANGE CLUB

The first meeting will be held at 7:30 p.m. in 111 of B-49, Neil Frischkecht of the Uinta National Forest and president of the Utah section of the SRM will be the speaker. His subject will be the role of range management in meeting society's needs.

### SKYDIVERS AT BYU

The skydivers will meet tonight at 7 p.m. in 163 JKB. Spectacular film to be shown. Everyone welcome. Learn about the sport of the space age.

### ARNOLD AIR SOCIETY

There will be an open house today at 8 p.m. in 205 JKB. All those interested are encouraged to attend.

## Modesto Club plans meeting

The Modesto Club, a new club on campus, will hold its first meeting Thursday at 10 a.m. in 109 ELWC, according to one of the club's organizers.

The purpose of the meeting is to organize the club and elect officers, Mark Schofield, sophomore in CDFR from Modesto, Calif., and an organizer of the club, said.

BYU students from Modesto and other interested students are encouraged to attend, Schofield said. The purpose of the club is to help members of the Modesto and Modesto North Stakes keep in contact with one another, he said.

A newsletter, which will shuttle from BYU to the Young Adults in the Modesto Stakes, will also be a function of the club, he said.

The club will coordinate efforts and try to be of service to club members at vacation time, he said. This could involve arranging transportation home or places for students to go at vacation if not traveling home, he explained.

Anyone with questions should contact Schofield or Steve Lords at 374-1950, Schofield said.

## in a tight squeeze?

Many December grads get caught in a tight squeeze due to a few missing credits. You may suddenly discover that you are short a few credits toward graduation and it's too late to add a class. BYU Home Study can reduce your worries. Every year, Home Study courses are a timely aid to hundreds of students who are faced with scheduling difficulties or who need to fill unexpected credit gaps. We offer you over three hundred college courses, covering a large part of the campus curriculum, including courses to fill general education requirements, many major requirements, and prerequisites for upper-division courses. If you feel squeezed to pick up a few necessary credits, you may complete most Home Study courses in a matter of weeks.

Don't get stuck in the process of graduating—contact BYU Home Study, 210 HRCB. (just south of the library)

**BY J. J. SHLACHTER**  
Associated Press Writer

With Korea (AP) — By day this city reverts from the city of the South Korean. High-rise buildings through smog. Shops are a bustle with people. But, however, a stillness and the same wide roads are crossed with roadblocks and soldiers who enforce a curfew. Armed and in battle formation, a reminder of what the city is the darker side of a new reality — the threat of a Communist North, and it has as grounds to deprive

citizens of basic civil rights, according to South Korean and Western sources. The nation presents a picture of economic vitality combined with political repression. The past 15 years have brought remarkable industrial expansion together with harsh measures that have all but silenced critics of President Park Chunghee. Intellectuals, clergymen and opposition politicians are in Seoul's Sudameun Prison. Criticism of the political system is a criminal offense and for those accused of it, habeas corpus — a writ preventing indefinite detention without trial — and other legal rights don't exist. Critics and supporters of Park both agree, however, that South Korea has experienced unparalleled industrial

growth during his regime, and the average Korean's lot has never been better than under the stern army general-turned-politician. In terms of real growth, the South Korean economy expanded at an annual average rate of 10 per cent over the past 15 years. Since Park came to power in a military coup in 1961, South Korea has developed from an economy based predominately on agriculture and fishing, which utilized 80 per cent of the labor force, to an increasingly industrialized one with more than half of the country's workers engaged in manufacturing and service industries. The annual per capita income, a gauge of economic performance, nearly doubled in the past five years from \$266 in 1971 to \$531 in 1975, and the government predicts it will top \$600 this year. Every month, Park holds a "performance meeting" with Cabinet ministers who report on how the economy actually has done against their earlier forecasts.

## Y Class rolls get new look

Class rolls used by instructors have a new format for fall semester, according to Carolyn Hassell, academic scheduling officer.

Miss Hassell explained that the Faculty Advisory Council requested the old horizontal rolls be replaced with a more functional roll. A new roll eight and a half inches by 11 inches was designed to meet the teachers' need, she said. These rolls will contain all adjustments through Sept. 17, she said. Any student who should have been added to or dropped from a class should check with his instructor to see that the roll is correct. If there is a discrepancy, the student should check with the Registration Office immediately, she explained. The student should bring his add/drop receipt with him to verify that he added or dropped the class. The main advantage to the new roll format is that it will fit into a standard-size notebook, she said. Also the new roll has an assignment section rather than an attendance section. Miss Hassell said that supplemental forms for recording attendance and additional assignments will be provided upon request.

## 75 years young, she's the town law

AUSTIN, Nev. (AP) — Kittie Bonner packs a gun, badge, bullwhip, scissors and spatula. She's the barber, scissor and baker in this central Nevada mining town. And she's 75 years old. There was a time she broke mustangs for fun — got \$12 apiece for the job. But she doesn't get around like she used to, though she's still able to rouse drunks off the street and over to jail. Kittie — as she's best known in Austin — was appointed constable 13 years ago, not long after her husband, then Austin's resident deputy sheriff, died. She's never had to use her 38 her bullwhip or blackjack, but says she knows how and wouldn't be afraid to wield them. "Most people just do what I tell them and that's good enough," she said. Though she's led armed posses, most of her work is in the Lander County Courthouse in Austin. She's the bailiff when court is in session. Austin was once a booming town. It's sleepy now, cradled in a steep

canyon, whose surrounding mountains crouched up about \$50 million in silver before the mines played out. Even with her court work, painting and the rest, she finds time to cut hair. There's an old barber's chair in her front room, sandwiched between stacks of old clothing. "Oh, you know, there are a lot of fellows who can't get out of town so I cut their hair for them. They pay me what they want to." When there's a wedding in Austin, the couple might come to Kittie for a professional job on a cake. Somehow, out of a cluttered kitchen, she manages to turn out wedding cakes of unique quality. She stores them in her bedroom so mice won't scurry down a chinked kitchen wall and nibble away her hard work. Kittie says she likes people, but is having a hard time adjusting to the younger generation. "You know, all these hippies are moving to Austin. They're real nice, but I can't get used to that long hair."

## Change in prayer book opposition, critics

ELIS (AP) — Moves to the 6th century Book of Prayer at the triennial general assembly of the Episcopal Church on Tuesday stirred a gale of criticism. "I could lose its 'great' here," says Walter Sullivan of Tenn., president of the Preservation of the Common Prayer. The society against the proposed revisions of changes in doctrinal

"There is less emphasis on man's innate sinfulness and on the judgmental function of God. A liturgical commission, has worked for nine years in updating the book's language and style," said Bishop Chilton Powell of Oklahoma City, chairman of the commission, in presenting the draft of the proposed Book of Common Prayer. It is the first major reworkings of the old classic since its origins in 1549, when the Church of England broke from Roman Catholicism, although there have been several minor revisions since then.

**Student teachers application deadline**  
Students are now being accepted for winter student teaching, according to Dr. Christensen, director of the Teacher Clearance. Students will need to get a "student card" from the Teacher Clearance Office. A student teaching packet at the school to turn the packet in to the Teacher Clearance to be checked before paying the \$45 application fee by Oct. 15. Dr. Christensen requests students to turn in packets early to avoid last week of the application period.

### Ford veto kills electric car bill

WASHINGTON (AP) — President Ford cast his 56th veto Monday, rejecting a bill under which the federal government would develop an electric car as a possible alternative to the gasoline-powered automobile. The bill would have established a five-year, \$160-million research program under the Energy Research and Development Administration. Ford said that private industry would be most able to undertake such a program.

# School enrollment drop seen

WASHINGTON (AP) — The nation's college and school enrollments this fall are expected to decline slightly from last year's historic high of 60.2 million students because of the low birth rate, according to the government's annual "Back to School" report released Tuesday.

The forecast calls for about 100,000 fewer students, the first drop since World War II when colleges were drained by young men entering military service and young women taking over their civilian jobs.

Total education expenditures in the 1976-77 school year, however, are expected to top \$130 billion, an increase of about \$10 billion over the previous year. The Department of Health, Education and Welfare, which prepares the annual report, said the enrollment decline can be expected to continue for several years. Elementary school enrollments have been dropping slowly but steadily since 1970, secondary school enrollments will peak this year, and college and university enrollments should begin falling around 1983 or 1984, HEW said.

The forecasts are somewhat less than precise, however. Last year, HEW predicted a total nationwide enrollment of 58.9 million students but undershot the mark by about 1.3 million because of higher-than-anticipated private school figures and a larger number of students who went to college or

graduate school during the tight job market.

Education will be the primary activity of 63.6 million youngsters and adults this fall, or about one out of every 10 Americans, and education expenditures will capture about 8 per cent of the Gross National Product—the value of the nation's goods and services.

Enrollments are forecast to decline more than 1 per cent, to 34.2 million youngsters, in public and private elementary schools, increase less than 1 per cent to 15.8 million students in high schools, and jump 4 per cent to 10.1 million in colleges and universities.

HEW said high schools will graduate more than 3.1 million seniors next spring, about the same as a year ago, while colleges are expected to award 918,000 bachelor's degrees, 60,000 professional degrees, 338,000 master's degrees and 37,000 Ph.D.s. All except bachelor's degrees would be record highs.

# Jet, small plane collide cause being investigated

BRIGHTON, Fla. (AP) — An Air Force jet which collided in flight with a small civilian plane was descending at the time to enter a restricted gunnery range in Central Florida, authorities say.

But the collision Monday that killed five people occurred about 20 miles outside the restricted area, an Air Force spokesman said.

"The jet was going pretty fast, that's for sure," said Jack Barker, spokesman for the Federal Aviation Administration. "Weather wasn't a problem." Barker said the cause of the collision had not been determined.

All four persons in the civilian plane were killed. The Air Force named Gregory Mellor of Torrington, Conn., as the pilot of the plane that was hit when he hit the ground, authorities said. His body was found several miles away from his parachute.

The F4E Phantom pilot, Thomas W. Mehlhoff, 35, of Ames Falls, Idaho, parachuted into a swamp area on a Seminole Indian Reservation and escaped injury, authorities said. The civilian pilot victim, identified as Golden J. P. Ruel, Jr., of Coral Gables, Fla.

## Food trash wastes savings

BOISE, Idaho (AP) — University of Arizona researcher Dr. William L. Rathji, after a study based on looking in garbage cans, says he has come to the conclusion that the average family wastes at least \$150 per year in food.

"Homemakers go out of their way to save pennies at the store, and then don't realize that waste of edible foods adds up to much more at home," said Dr. Rathji, an anthropologist. He's one of about 100 foods experts gathered in Boise for a conference on food waste and ways to prevent it.

American families throw out between 8 and 20 per cent of edible food at a cost of \$4.5 billion per year, he said. That's almost as much as the federal government spends every year for food stamps and child nutrition programs.

He bases his estimates on an annual garbage collection study by Arizona students, measuring food wasted in the Tucson area. He says it's rather presumptuous to make national estimates based on Tucson-area studies. "But we're the only ballgame. There's no other data available," he said, in proposing more research on the subject.

## LDS call region leaders

An Air Force officer in Germany and four other men have been called as regional representatives by the Church of Jesus Christ of Latter-day Saints.

The new regional representatives were called earlier this month, according to Don LeFevre, assistant director of church communications.

The Air Force officer, John Lassater, was appointed to the servicemen's region in Germany where he is currently stationed. The other four were

called to regions within the United States. They are, Robert Brady of Brentwood, Tenn., assigned to the Miami and Tampa, Fla., regions, and Harvey Greer of Fair Oaks, Calif., to Chico and Santa Rosa, Calif.

# The Hewlett-Packard first family of calculators are in a class by themselves.

Hewlett-Packard built the world's first advanced pocket calculator back in 1972. And led the way ever since.

Today, Hewlett-Packard calculators are recognized as The First Family by more than one million owners worldwide. Including Nobel Prize winners, USA-USSR astronauts, explorers, educators, scientists, businessmen, and students. Here's why:

### First family design.

Hewlett-Packard was first—and continues to lead—in the translation of state-of-the-art technology into advanced calculators.

### First family performance.

Hewlett-Packard means the kind of performance that includes RPN logic with four-memory stack, a full range of advanced functions, and much, much more.

### First family reliability.

When you buy a Hewlett-Packard calculator you get one year's protection on parts and labor. And a two working-day turn-around on most repairs.

### First family support.

Every calculator comes with its own comprehensive Owner's Handbook. In

addition, a complete selection of accessories increases the versatility of your choice. Hewlett-Packard offers more because Hewlett-Packard more to offer.

### Free booklet while supplies last.

"What To Look For Before You Buy An Advanced Calculator" helps you make a wise purchasing decision. Pick up your free copy at your campus bookstore, telephone 800-538-7922 (in Calif. 800-662-9862) toll-free for the nearest dealer.

### HP-21 Scientific. New low price—\$80.00\*

The HP-21 makes short work of the technical calculations even so-called "non-technical" courses. If you need a calculator that does more than simple arithmetic—this is it—especially at its new low price.

- 32 built-in functions and operations
- Performs all standard log and trig functions (in degrees)
- Performs rectangular/polar conversion, register arithmetic and more
- Addressable memory
- Two display modes: Fixed point and scientific

### HP-22 Business Manager \$165.00\*

The HP-22 easily handles the kinds of calculations you face in business courses today, in management tomorrow. Breeze through business math calculations. Build existing statistical data into reliable forecasts you're going into business administration, this is a calculator for you.

- Combines financial, mathematical and statistics capabilities
- Performs complex time-value-of-money computations including interest rates
- Performs rates of return and discounted cash flow for investment analysis
- Performs extended percent calculations, accumulation, amortization, etc.
- Ten addressable memories
- Full decimal display control

### HP-25C Scientific Programmable with Continuous Memory. \$200.00\*

The HP-25C is our keystroke programmable, solve automatically the repetitive problems even science and engineering student faces. What's Continuous Memory? It's you retain programs an even when it's turned off.

- Continuous memory capability
- 72 built-in functions and operations
- Keystroke programmability
- Branching, conditional test and full editing capabilities
- Eight addressable memories
- We also offer the HP-25, (without the Continuous Memory feature) for \$145.00\*

### HP-27 Scientific/Plus. \$200.00\*

The HP-27 is for the science or engineering student whose course work extends into business administration. The reason? It features every pre-programmed function we've ever offered, plus comprehensive mathematical and financial functions. Thus the name: Scientific Plus.

- 28 pre-programmed exponential, log and trig functions
- 15 statistical functions, 10 financial functions
- 10 addressable memories—20 memories in all
- 6 selective clearing options gives flexible use of memory
- Fixed decimal, scientific or engineering display

# Food loss experts meet to study waste, spoilage

(AP) — A food loss has been estimated that 30 to 40 per cent of crops harvested in developing countries is lost. Even in a country as highly developed as

production is lost, either during growing or processing or by spoilage and waste on the way to the consumer. It's been estimated that 30 to 40 per cent of crops harvested in developing countries is lost. Even in a country as highly developed as

the United States, some 15 per cent of the production is wasted.

The food loss conference, which has drawn experts from all over the world, continues through today. It seeks to outline problems which might be researched and headed off in the next 10 to 20 years, when world food supplies might be critically short.

"What we're looking for is researchable ideas," said Dr. John O. Early of the Department of Agricultural Economics at University of Idaho. "We need some direction."

"What should we consider lost?" he said. Potatoes kept in storage usually lose about two per cent of their weight through loss of water. Should that be considered a food loss?

Food handlers used to trim the outside leaves off lettuce and wrap the heads in plastic. Early said companies now leave the outside leaves on, ship them, and the heads are trimmed by the stores. That might be considered a food loss, he said.

"We know how to reduce some of these losses," he said. "But the costs to do it now are more than it's worth."

The conference, which has drawn delegates from Italy, Canada, Europe, South America and the United Nations, also is exploring some of the side issues.

"We think 20 per cent of the potatoes that are grown or processed never reach the table," he said. "What would

happen if we increased the supply by 20 per cent?

"Would that make spuds so unprofitable that no one would grow them?"

"The problems of supply aren't acute today. We're building stocks of wheat this year thanks to a good harvest. Next year we will have more wheat on hand.

"So people aren't as concerned about losses as they were in July of 1975 when we were really short," he said.

Avoiding waste in food once it is produced would be beneficial in several ways, Early said:

—The food supply could be significantly increased without bringing more land into production or using extra fertilizer or fuel.

—Energy used to produce wasted food could be saved.

—Problems of garbage disposal and resulting pollution could be reduced.

—Consumer needs could be more fully satisfied and better nutrition provided with the same resources and expenditures if food wasn't wasted.

Early said most information on food loss is scattered, incomplete, out of date or nonfactual.

Researchers hope to pinpoint where the biggest losses occur, what causes the loss and how to prevent it, Early said.

## House okays bill

### WACs may be abolished

WASHINGTON (AP) — The Women's Army Corps, for 34 years the only Army that female soldiers have known, may soon be history.

The House of Representatives, after hearing a committee report that called the separate distinction for more than 40,000 WACs "a vestige of the time when women were not treated equally," voted overwhelmingly Monday to do away with the special women's corps and to integrate women fully into the Army.

The bill, which also eliminates sex distinctions in the promotions of officers and other military policies, passed by a 343 to 4 vote. It now goes to the Senate.

"The Army has arrived," said Air Force Lt. Col. Lucille Dion, acting executive secretary of the Defense Advisory Committee on Women in the Armed Services, in reporting that the Pentagon backs the legislation.

"This would be another step forward for women in the armed services," Lt. Col. Dion said. "It's a logical step."

She said equal footing with male soldiers would prove beneficial but declined comment on just how the new status would change Army life for the young recruit or career Army woman.

The bill passed by the House would abolish the WACs within 90 days of its enactment.

## Montana State chief steps down in 1977

(AP) — Carl McIntosh announced he will resign as president of Montana State University, the first in which he will serve since

30 years, and I am pleased by the prospects of a research professorship as an alternative to a continuing commitment to the requirements of the office I hold," he told the regents at close of their September meeting.

McIntosh ran into trouble with the regents early this year when he failed to properly report the existence of about \$1 million in student fees to board officials of the Montana University System.

McIntosh was president of ISU from November 1947 to September 1959, when he resigned to become president of CSULB.

Lawrence K. Pettit, the state's commissioner of higher education has been directed by the board to set up a search and screening committee to seek a replacement for McIntosh for the 1977-78 academic year.

## Unlabeled contracts for medical students in Idaho, Wyoming

(AP) — The University of Utah Council Monday approved a contractual educating medical students from Idaho

Dr. Dixon, health sciences vice president, signed calls for Idaho to pay Utah's state educating five medical students and pay the costs for 10 students.

Most, including tuition, fees, buildings and had been calculated at \$15,000 per year.

The tuition for nonresident students at Utah State College of Medicine is \$3,000. Over 90 per cent of students attending state medical schools are residents, leaving only 10 per cent open to states like Idaho which have no medical schools.

The population growth in both states has made the need for physicians more acute.

# Y women field strong teams

By DALE EDWARDS  
Universe Sports Writer

BYU men's athletic teams have consistently placed well in league competition, but so have the women's.

The BYU Women's Intercollegiate Program is a member of the Intercollegiate Conference of the Association of Intercollegiate Athletics for Women (AIAW), according to Lu Wallace, women's athletic director at BYU.

The Intermountain region contains schools from Arizona, Colorado, New Mexico, Idaho, Wyoming, Utah and Texas, Miss Wallace said. Team schedules center around conferences and/or regional tournaments with qualifications for national championships.

BYU offers intercollegiate competition for women in eight sports, Miss Wallace said. These are basketball, field hockey, gymnastics, golf, swimming and diving, tennis, track and field, and volleyball.

Some sports such as golf and track and field do not have regular conference schedules but are played according to coaches' schedules, she explained. These schedules are arranged by the coaches themselves and not by the league.

## Volleyball strong

Volleyball is one of BYU's strongest women's sports, Miss Wallace said. The team was undefeated in conference play in 1975 and placed fifth at the national tournament with a season record of 23-3. BYU has ranked among the top eight teams at the nationals for the past six years and will host the 1977 nationals, she said.

This year's basketball team will be without the services of Jan Peterson, one of the league's outstanding players last year, Miss Wallace said. Also missing will be Dorothy Stumpe and Debbie Bennett.

Incoming freshman players and transfers will add strength to the team, according to Elaine Michaels, women's basketball coach. Tina Gunn, a 6-4 player from Florida, will be coming to BYU in January and should add strength to the team, she said.

BYU will sponsor its first BYU Basketball Classic in January, Miss Wallace said. It will feature Cal State-Fullerton, the team ranked fifth at the national tournament last year. BYU will also compete against national champion Delta State in the Las Vegas Classic, she said.

BYU's tennis and field hockey teams

A member of the BYU women's field hockey team drives for the ball during 1975 action. Women can compete in eight sports at BYU.

each placed second in the conference or region last year, Miss Wallace said. The field hockey team scored 65 goals in the season to compile a record of 13-3.

The tennis team had a record of 32-4 on the season with a 28-3 record in conference play, Miss Wallace said. The team defeated Arizona State for the first time in ten years.

## Swimmers young

Last year's swimming team was very young, but still placed fourth in the regional tournament, Miss Wallace said.

This year's team will be strengthened by the addition of Lelci Fanoimona, who made the finals in the Montreal Olympics for the United States Olympic team. BYU will host the regional championships in swimming Feb. 17-19, 1977, she said.

This year's track and field team should be much stronger, Miss Wallace commented. Maria Garcia, an Olympic runner from Mexico, will be competing for BYU this year. Laura Burnham, a freshman from Utah, won the high jump at the BYU

Invitational track meet last year with a jump of 5-8 and will compete for BYU this year, Mrs. Wallace added.

## New record

BYU's women's gymnastics team scored a new record 94.43 points in a meet and has consistently scored as high as or higher than previous years. Incoming freshmen will add depth and hopefully will help BYU to finish higher than last year's seventh in the regional tournament, the women's director said.

BYU's women's golf team will add the talent of Tiru Fernando of Sri Lanka, Miss Wallace said. Tiru was usually ranked in the top four of the tournament she played in. This and the addition of some excellent recruits will give the team some added depth, she said.

"We feel we have a good year ahead," Miss Wallace said, "and we'd like to see the student body out to support the activities."

Information about women's sports can be obtained in 297 RB or ext. 4225.

## Events scheduled for Y Cougar Day

For golf and football buffs, Cougar Day will be a big event. A tournament featuring Johnny Miller, Billy Casper, Mike Resor and Mike Reid will add spice to a campus athletic scene for Saturday, which already includes BYU's first home game and initial Western Athletic Conference contest of the season.

The football game against Colorado State doesn't start until 7:30 p.m., but there's plenty to do during the day at Riverside Country Club.

A golf clinic and exhibition by the four professionals is scheduled for 9:30 a.m., with a driving contest at 11 a.m. and an autograph session at 11:30. The afternoon will find the four pros teaming with members of BYU's second-place NCAA golf team for a best ball tournament.

Tickets are \$5 for adults and \$3 for

students and are available all the Marriott Center Ticket Office.

They will be on sale at the Saturday. Miller, the PGA Player of the Year in 1974 and No. 1 money winner and Resor, a seven-year veteran tour and winner of several tournaments, are alumni of Casper, a two-time U.S. Open and one of the top money winners all time, lives in nearby Maple has been active as a recruit fund-raiser for BYU.

Reid, an All-American all four years, will make his debut on after winning the Pacific Amateur this summer. He led Open after the opening round, a semifinalist in the Western and quarterfinalist in the Amateur.

We are offering a 20% DISCOUNT on all Hardbacks that appear in the New York Times Book Review "Best Sellers List."

## Thursday pickup for football tickets

Ticket distribution for the Colorado State game this Saturday will be Thursday from 8 a.m. - 5 p.m. Students should pick up their tickets according to the last digit of their Social Security number:

8 a.m. - 5 p.m.	0-1
9:30 a.m. - 5 p.m.	2-3
11:30 a.m. - 5 p.m.	4-5
1:30 p.m. - 5 p.m.	6-7
3:30 p.m. - 5 p.m.	8-9

"BYU branch members need not have signed a block-seating list. Just come in, pick them up and go," said Randy Smith, assistant ticket distribution chairman.

"Off-campus wards and stakes or clubs did need to sign a block-seating list," he added. For future games, "If you don't have a list, you can sign the general list in the ASBYU office until 5 p.m. the Monday before the game."

Digit times will be enforced, "because it is the only way to avoid lines," Smith emphasized. "Only a certain portion of the students will be there at a time that way, and we can get them through."

Guest passes will cost \$3.50 each.

## Handball tourney at Y till Saturday

The Utah Valley Handball championships, a regional tournament, will be held today through Saturday in the Smith Fieldhouse courts.

Wednesday, Thursday and Friday play will run from 6-10 p.m. The finals will be held Saturday beginning at 10 a.m.

Sponsored by the Utah Handball Association and Park's Sportsman, this is the third year the tournament has been held at BYU. Participants will come from the western states.

Tournament play will be in three divisions: open singles, B singles and open doubles. Skill and experience in the game determine if participants are in the open or B division.

Dr. Charles Walter, a professor in the BYU Mathematics Department, is the three-time defending Utah state champion and will be the No. 1 seed in the open singles.

The public is invited to attend the tournament. The games may be watched from the court balconies in the fieldhouse.

## BYU cagers seek manager

A meeting for prospective BYU basketball managers will be held today at 3 p.m. in the Cougar Room of the Marriott Center.

One position is available to young men of sophomore or junior class standing. Applicants should be free 3-6 p.m. Monday through Friday for varsity practice.

According to Leonard Welsh, head basketball manager, prerequisites to the position are experience and a wide knowledge of basketball.

# ASU flaws spotted

(AP) — Had Arizona Nebraska in the Fiesta Bowl, the ASU team would have been shocked in their first Thursday night by a team that dominated the game and posted a 12-0 record.

Sun Devil opponents thought all we had to do was to follow the lead of the ASU team, and the fact that we were able to handle the offense like UCLA's example, won only two seasons, but gave ASU its of the season. Not the Cowboys run the

12-0 team wasn't all that different from this year's in terms of personnel. The chief losses to graduation were on defense. All-America cornerback Mike Haynes and two All-WAC players, linebacker Larry Gordon and tackle Randy Moore, would be hard to replace on any team.

What is missing more than saying on defense, Kush says, is a leader. Partly because of that, the defensive unit has not been aggressive and shows some mental hesitancy.

"We have a complicated defense which takes time to learn," Kush explains. "We have some young people in that unit, along with some veterans who are playing new positions."

The standouts in the defense are 6-foot-4, 225-pound Willie Scroggins, an All-WAC defensive end last year who has been switched to tackle, All-WAC cornerback Mike Martinez and safety John Harris.

Offense is a different story, and the Sun Devils should be as explosive as ever.

Kush calls Sproul the "key to the whole ball club." The 6-2, 215-pound junior emerged as a tough, intelligent leader last year, beating out Fred Mortensen for the No. 1 job. "He's one of the finer quarterbacks we've ever had here," says Kush.

Sproul will be throwing to as fine a receiving tandem as there is in college football. Split end John Jefferson, a junior, has led the Devils in receiving the past two seasons, catching 44 passes for 808 yards and five touchdowns last year. Senior wingback Larry Mucker caught 42 passes for 757 yards a year ago.

There's also ex-quarterback Bruce Hardy who's developing into a top tight end.

Steady Freddie Williams has run for 1,299 and 1,316 yards the past two seasons, and Kush doesn't expect any less of him this fall. Freshman Arthur Lane could wind up as the other starting back.

The Devils have solid starters along the line, but center is a trouble spot.

Danny Kush, the coach's son, is a capable place-kicker, and Mortensen is the punter.

Despite their opening loss, the Sun Devils must remain a solid choice to win the WAC. But hopes for a national championship are lost.

Sun Devil quarterback Dennis Sproul releases a pass as Cougar Stan Varner moves in during last year's game between ASU and BYU.

# ennis booming, ws big crowds

LLS, N.Y. (AP) — Move bowl. Make room there, race yourselves-big-time soccer and golf.

A new kid in the tennis boom. He's a kid, already growing out and getting fat and sassy.

The boom. The event drew a total of 10,000 fans—30,000 more history—and established as one of the premier events of the world.

West Side Tennis Club and itself unable to gracefully the hordes through the gates.

traffic jams outside the than congestion choked separate the courts little complex. crowd, the people who on Square Garden andiseum for basketball and prize fights.

ried. ey should have been the highest of tributes ally has been accepted a commercial enterprise long-time sports in which tribute to the almighty athletes play for prizes early salaries of corporate

Pro sport

ort. It is now drawing a e man who lays out \$6 eat and pays \$1 for a can has the right to exercise he chooses. So he does. ms emerged as one of the or of spectator sports, eed men's tours and a also prosperous that Chris ore in prize money than alities have flourished. rs, who beat Sweden's r the men's singles title given impetus to the

Chris Evert ...-outs-ears Nicklaus

game—first with his brash and all times a brash personality, then with his sweep of the Australian, Wimbledon and U.S. titles in 1974, followed by head-to-head victories over Rod Laver and John Newcombe in Las Vegas.

Maverick

The maverick, Nastase, has provided dashes of color and excitement while alienating thousands of fans with his boorishness and inexcusable profanity. Borg, 20-year-old son of a groceryman, has captivated the tennis world with his apparent absence of emotion and his unorthodox style.

The women have shattered the men's domain with a captivating cast that includes the outspoken Billie Jean King, the nerveless Miss Evert and the graceful lady from the Australian outback, Evonne Goolagong.

Tennis has a product to sell and countless prospective buyers. It is unfortunate that the game has grown so fast that, when it is ready to show off its finest wares in its big national championship, it finds itself restricted to a complex the size of the West Side Club, built for the leisurely atmosphere of the 1930s.

When 16,000 come out for the matches, the crowd spills out of the old concrete horseshoe. The U.S. Open, gauged on current interest, could draw 30,000 to 40,000, perhaps more.

But when will somebody build a stadium big enough?

## Applications due Monday for Homecoming parade

The 1976 BYU Homecoming Parade will be held Oct. 9.

Applications to enter the parade must be in the Social Office by Monday. The parade committee will help find sponsors or answer questions about float design.

For more information or help, contact Lisa Cartwright in 436 ELWC or call ext. 4083.

The theme for the parade is "Beginning a Second Century of Strength." This theme reflects the athletic, academic and spiritual strength of BYU students in the past and in the future.

"We hope to see a representation of each of these strengths in the parade this year by the participation from campus clubs, organizations, branches, stakes and student talent," said Jerry Redd, chairman of Our Gang.

There will be trophies, cash prizes and publicity for the top entries. All on-campus entries will be judged separately from off-campus organization floats.

University Across from University Mall South of BYU on 8th North

four games to two in baseball's World Series. Things have changed considerably in the world since 1923. But one thing hasn't changed. Ken Rogerson still sings in the Mormon Tabernacle Choir.

### Program Broadcasts

Rogerson and his fellow singers will be featured on upcoming broadcasts and telecasts of the 146th semiannual world conference of The Church of Jesus Christ of Latter-day Saints in Salt Lake City. Portions of it will be carried by more than a thousand radio and television stations throughout the world.

When Ken Rogerson began singing with the Choir, the musical ensemble was still six years away from its first regular network radio broadcast. Today, the Choir's weekly program, "Music and the Spoken Word," is the longest running network show in radio and is approaching its 2,500th show. Rogerson has been on hand for most of those programs.

### Names Highlights

His greatest thrill as a member of the Choir for more than half a century? There are two of them.

"It has been a thrill for me to travel with the Choir around the world and sing in the great concert halls. When I sing in Carnegie Hall, in London's Royal Albert Hall,

Symphony Hall in Boston or any of the other great halls, I ask myself 'Is this really me, singing here where the great musicians of the world have performed?'

"His second 'greatest thrill'?" "Concertwise, the greatest thrills I have had have been singing with the Philadelphia Orchestra. When we have appeared with this marvelous organization, while making recordings or during concerts, we have sung the greatest music in the world with one of the greatest orchestras.

"That, to me, is the ultimate musical experience."

### Anniversary Goal

Rogerson doesn't know how much longer he will remain with the Choir, but the 50th anniversary of the Choir's network radio show is "sort of a goal." That anniversary will be observed in 1979.

Whether he makes the 1979 goal or not, the Rogerson tradition in the Choir should be perpetuated for several years anyway. Ken has two children in the Choir. Daughter Ann Adams, a soprano, has sung for 16 years, and son Tom is just now marking eight years in the baritone section.

When he is not rehearsing or performing with the Choir, the elder Rogerson now spends most of his time on his ranch in Utah's mountains, or playing golf.

"Meanwhile, I'm looking forward to the birth of my first great-grandchild about Christmastime," he proudly exclaimed.

## Y plans to feature 'Light' in Friday's pillow concert

A local rock group, "Light," will perform in the first pillow concert of the semester Friday at 9 p.m.

Tickets for the concert, which will be held in the Main Ballroom, ELWC, are \$1.50.

According to Mike McLean, keyboard player and composer for the group, "Light" will perform several new songs which will be released in an album the band is currently working on.

The group has performed at BYU three times and has been working on advertising

campaigns, including a nationwide campaign for the church, said McLean.

The concert at BYU will start a college concert tour across the state with performances scheduled for Utah State, Weber State, Cedar City, Snow College and Dixie College.

According to McLean, the group's style has changed somewhat since their last concert here. "The biggest thrust of our concerts is to have a good time," he said.

## Y senior musician awarded scholarship from Wyoming

Dr. A. Harold Goodman, chairman of the BYU Department of Music, announced that Marilyn Collard, a senior in music composition, recently received a scholarship from Caribou Four Corners, Inc., more commonly known as the Maverik Oil Co., with headquarters in Afton, Wyoming.

A native of Idaho Falls, Marilyn began her music studies in Idaho Falls in piano and has recently studied with Dr. Reid Nibley and Dr. Robert Smith, both of the BYU piano faculty. She has also studied extensively with Dr. Merrill Bradshaw, composer-in-residence at BYU, and Dr. Robert Manookin. She has performed for several semesters with the BYU Philharmonic Orchestra as well as studying composition.

The recipient of the scholarship was selected jointly by the scholarship committee of BYU and Dr. William A. Call, vice-president of Caribou Four Corners, Inc. Dr. Call is a graduate of BYU having received both his bachelor's and master's degrees in music. He later received his DMA in music composition from the University of Illinois.

Marilyn Collard scholarship winner

## 'Our Gang' plans party

The "Our Gang All Night Bowling Party" will be Friday Sept. 17-18.

The Game Center will be reserved for the party which begins at 11:59 p.m. Friday and ends at 4 a.m. Saturday morning.

Activities will include miniature golf, shuffle board and ping pong. There will also be a dance. "Wolfman" Mark Knudson will be the master of ceremonies.

Tickets will be on sale Wednesday in the Wilkinson Center ticket office.

## OPINION - COMMENT

Brigham Young University

### A 20th Century parable, are we nearing the end?

The master called his two servants into him. Providing one servant with a single talent and the other with 10 talents, he sent them forth to prove themselves by using their talents wisely.

Now the servant with one talent was a lazy and slothful man who immediately went into a nearby field and buried his talent deep in the earth. The next day he applied for unemployment and qualified for food stamps.

The other servant was a diligent individual who went straight-away into the world to invest his talents.

Unfortunately, he was immediately assessed four talents for federal income tax because of his high 40 per cent tax bracket.

Another three talents were spent when he had to pay state income tax, county property taxes, garbage fees, a special improvement district assessment, water and sewer levies, motor vehicle registration and tax on his truck and camper.

The diligent servant then found it would cost him one more talent to have a house compulsory no-fault auto insurance so that he might drive his truck and camper.

Still another talent was lost when the servant found that his heart did not contribute to the United Fund, the Red Cross, the Boy Scouts Sustaining

Membership Drive, the Heart Fund, the March of Dimes, the Girl Scouts, the National MS Society, the Jerry Lewis Labor Day Telethon for Muscular Dystrophy and the Save The Raisin Foundation.

All this left the diligent man with but one talent—which he immediately invested in the stock market.

However due to inflationary recession and recessionary inflation and other financial reverses in the economy, most of his profits were eaten up and he rarely saw a dividend check.

Then the master called his servants in for an accounting.

The slothful man grabbed a shovel while the diligent servant called his broker and liquidated his assets.

After his capital gains were taxed, the diligent man found himself with two talents but had to spend one of them in order to pay for an audit that would comply with federal guidelines. So, when each servant appeared for his accounting, each had only one talent.

And the master was wrath because the slothful servant had fared no better than the diligent man, so he cancelled the entire system . . . taxes, United Fund, stock market and all.

Moral: The end is nearer than you think.

Don Baker

By LOUISE COOK  
Associated Press Writer

Here is a guide to the views of President Ford and Jimmy Carter and their parties' platforms:

**ABORTION:** Both men personally oppose abortion. Carter also says, "I do not favor a constitutional amendment which would prohibit all abortions, nor one that would give states local options to ban abortions." Ford opposes a national ban on abortion, but adds: "I have supported . . . because I think it may be a practical and moral solution . . . an amendment which would permit each state, or the voters in each state, to make the decision on that state's abortion policy."

**BUSING:** Both men are against forced busing for integration. Carter says it doesn't work, but adds that he will support the ruling and the federal courts. "I believe this is not the subject to be reopened with a constitutional amendment," he says. Ford, who sent legislation to Congress limiting busing programs, says: "I believe that busing as a remedy ought to be the last resort and that it ought to be limited in scope to correcting the effects of previous constitutional violations."

**DEFENSE:** Carter has said, "Our ultimate goal should be the reduction of nuclear weapons, in all nations to zero." Meanwhile, he wants to maintain rough equivalency with the Soviet Union which he says we now have. He would cut defense spending by "reducing the arms and far" without rears "our strategic deployment of nonnuclear weapons and delivery systems"; and would gradually withdraw some U.S. troops from some areas. Ford proposed a record peacetime defense budget and said the United States "is the single most powerful nation on earth . . . indeed in all history . . . and we're going to keep it that way." He criticized Carter's troop withdrawal plan, saying: "We cannot lay down our arms in the simple hope that others will follow our lead."

**GRAIN SHIPMENTS:** Carter told a crowd in Des Moines, Iowa: "Under my administration, if I'm elected, there will never be an embargo that singles out farm products." He said later he would not rule out embargoes under all conceivable circumstances, but added: "It would have to be an extreme case." Ford, who imposed a

temporary grain embargo last year, said in his speech accepting the GOP presidential nomination, "We will never use the bounty of America's farmers as a pawn in international diplomacy. No embargo."

**JOBS:** Carter says, "I think the major priority of the next administration has got to be unemployment." He supports the Humphrey-Hawkins bill which seeks to reduce adult unemployment to 3 per cent by 1980, but says he prefers job creation in the private rather than the public sector. Ford also stresses private employment. "But," he says, "the federal government can create conditions and incentives for private industry to make more and more jobs."

He says he expects unemployment to fall below 7 per cent this year and 6 per cent next year. Both men propose incentives to encourage private industry to provide jobs.

**SPENDING:** Carter has said, budget with full employment by 1979. . . . He also promises, "There will be no new programs implemented under my administration unless we can be sure that the cost is compatible with my goal of having a balanced budget before the end of my term."

Ford proposed a \$394-billion spending ceiling for fiscal 1977 which would cut the federal spending growth rate to 5.5 per cent. "I have promised . . . and I will maintain that promise . . . that we would make substantial headway in reducing the federal budget deficit. We will submit in the fiscal year 1979 a balanced budget," Ford says.

**TAXES:** Carter has promised a complete analysis of tax system and reform of the tax system, presenting a program to Congress in the first part of 1978. He says he has four basic principles: "Treat all income the same . . . tax income only once . . . a progressive tax rate . . . greatly simplify the whole system. Ford says, "A major objective of reform should be 'to simplify the tax system as well as make it more equitable. My administration's objectives are threefold: greater equity, greater simplification, and lower taxes. My program also includes a program of further tax reductions. Benefits are directed toward middle and lower income tax payers and incentives for creation of new jobs by business. These cuts would be linked to comparable cuts in federal spending."

democratic society of America. It is completely foreign to the ideological climate of a freedom-loving people. It is that the basis by which the success of Mao Tse-tung should be judged? Is he to be assailed as a ruthless tyrant by democracies, and hailed as a great leader by those countries at the other end of the political spectrum? Mao's life and the impact he has on the world cannot be packaged that concisely or in such simplistic form. It's not that Mao is a great leader, a communist empire, but rather a leader leading that empire? For the past thirty years, he has been leading that quarter of the world's population toward better living conditions, economic prosperity, industrial modernization and world prominence.

### Provo's landlords finding way to bypass parking ordinances

Provo landlords are finding a way to get around the city's tough new parking ordinances without providing students parking.

The Provo city law requires landlords to meet minimum parking standards of one-half parking space per tenant. Most landlords can meet this standard, but have found continuing to provide one off-street parking space for each tenant possessing a vehicle stiffer to meet.

More students each year are bringing cars to Provo. Landlords, faced with the often impossible task of providing enough off-street parking for all vehicles, are writing provisions into their contracts to discourage the influx of automobiles.

One complex, for example, charges \$5 per month for parking spaces. Others have clauses written into their contracts prohibiting students from bringing any vehicles at all to school.

It is legal for landlords to charge for parking, according to City Planning office personnel. The city can only enforce the parking standards; it has no control over how complexes meet it.

Angry students in complexes which charge a fee for parking have accused landlords of ripping them off, but the fee is obviously not imposed for profit. Some estimates have suggested that the average landlord makes as much as 40 per cent profit on housing.

The fees are simply an attempt on the landlords' part to keep within the ordinance. They have not, however, substantially alleviated the problem. Students who don't want to pay the fee bring their cars anyway and park them on the street.

The resulting congestion causes complaints from non-student neighbors—just one more part of the town vs. gown tension—and thwarts the

purpose for which the off-street ordinance was instituted in the first place.

Some solution to the problem must be found, but it will come only through cooperation on all sides. Perhaps students can evaluate their needs for vehicles and decide they do not need one after all. Maybe some landlords can find room to expand parking facilities.

In the meantime, students who must park on the street should take care to be courteous and safety-conscious so that they do not gain the reputation of unwelcome intruders in Provo.

—Donna Roviore

### When it is stolen, who would own it?

Recently, Pakistan requested that England return the Koh-i-noor diamond.

Interestingly, it once belonged to the royal family of India. In 1304, a sultan grabbed the diamond from a rajah, and later, the British took it, when there was no Pakistan. Now, Pakistan claims the gemstone as prior possession established ownership, the stone would have to be returned to India, not Pakistan. Who has rights to it?

In South Africa, black Africans claim legal and social equality. That is right, but the idea of a people being purged from the land that belongs to them is another matter.

When the whites first arrived in

South Africa, there were three main tribes of blacks in the area. The Zulu, the Bantu and the Hottentots. The Zulu had just arrived, and were in the process of building an empire at the expense of the other tribes.

The example is repeated elsewhere. The Picts lost what is now England to the migrating Britons. The Saxons came later and lost to the Normans. The same situation exists in Israel today, with several groups claiming the same homeland. Each claim has a certain validity.

The question of whether Pakistan will get the Koh-i-noor diamond is fairly trivial, but the question is: who owns what?

—Michael White

### Letters to Editor

## Hunting, fishing, book policy discussed

### Hunt, fish legally

Editor: Many BYU students will hunt or fish in Utah this year. Many of you are now preparing for the upland game hunting season which begins Sept. 18, or perhaps you plan to kick off your hunting experience on Sept. 29 when the open bull elk season begins.

As a Conservation Officer for the Utah Division of Wildlife Resources, I am concerned that all sportsmen familiarize themselves with regulations governing these and other types of hunting seasons. Wildlife laws are available to the public in proclamation form for sixty days immediately prior to the season. The reason for this is to allow hunters to become familiar with the laws before they enter the field.

If you are a student coming to Utah from another state or country and desire to hunt or fish in Utah, you should especially be aware of the state's residency requirements. Before you purchase a fishing or hunting license, the law requires that you be physically present in the state of Utah for sixty days immediately prior to purchase. This license becomes invalid upon the purchase of a resident license for hunting, fishing or trapping in any other state or country.

After you become qualified to purchase a Utah resident hunting or fishing license, as a precautionary measure, carry some type of proof of residency with you into the field. If you are checked by an officer, you should be able to prove that you are a student and have been in the state for 60 days prior to the time you obtained the license.

I think everyone will agree that our great open spaces and the species of invaluable wildlife which inhabits them, provide tremendous aesthetic and recreational experiences. We should—must—treasure. Enjoy our natural resources, but use them wisely.

WES SHIELDS  
Conservation Officer  
Wildlife Resources

### Why can't we buy text?

Editor: We are writing this letter in concern with a problem we have faced in dealing with the bookstore.

A great number of us have attempted to attend our Accounting 201 class, but to our dismay we have not been able to obtain the proper text assigned to this class. The reason for this dilemma is that due to a communication barrier between the Law School, the Accounting Department, and the bookstore, the 2,000 books that were ordered were sold out the third day of school.

This problem was facilitated by the purchase of more than one-third of these texts by the Law School, without notification to any of the other departments.

Another problem we have faced is that there are at least two dozen available texts in the special order department which they will not let us buy because the people who ordered them three weeks ago are too lazy to pick them up.

The frosting on the cake is that there are no used books available because the department changes the text every semester.

Can anything be done about this monopolistic enterprise? And who's gonna do our homework?

RAND RAMEY  
Provo

### Raps writing

Editor: I was a little taken back at reading the report of Elder McConkie's fireside address.

If we took a moment to get out the Sept. 8 issue of the Universe and look on page three, we would find that about fifty per cent of the paragraphs start with the same two words. Most people won't be surprised to find out that we haven't encountered the most readable style in the world.

Comparing the front page article on President Kimball's visit, we find a reporter who appears to have used much more ingenuity in avoiding this tendency, even though it is found in three of the first seven paragraphs, roughly a critical area in capturing reader interest. Only nineteen per cent of these paragraphs have this failing, however, and some are examples of how this redundancy can be avoided.

It is hoped that this observation might be taken to heart the next time someone has to write an article with such an off-called-for reference.

JOE LARSEN  
Provo

### Vote -- while you can

Editor: I see by the papers that approximately 70 million voters will not participate in this year's election because of "Grits 'n' Fritz" vs. "Dull 'n' Doie." The reason given are, to be charitable, immature.

We are expected to accept these protestations of aloofness as a genuine expression of disenchantment or disillusionment with the political scene, and with the process of election itself. Prof. John T. McNeill, the great Calvin scholar of the 20th century, stated it best when he said: "Political indifference on the part of Christians is not a mark of superior piety but of defective ethics."

The real tragedy is that the drop-outs are mostly those with sufficient education to understand the issues, and to know when they are being "snowed." Yet less than half of the eligible voters will determine the

### Suggestion High School Physical Ed

There are some high schools that believe it or not, who actually going to physical education to understand them, one must understand what it is like to be the last one when teams for sports like basketball and football are chosen.

The instructor usually chooses the best athletes for team sports. captains, in turn, choose players (the captains) evaluate their skills. The instructor usually chooses the best athletes for team sports. captains, in turn, choose players (the captains) evaluate their skills. The instructor usually chooses the best athletes for team sports. captains, in turn, choose players (the captains) evaluate their skills.

The unskilled may smile, but has to hurt. They are labeled "have the stigma of the 'can't' that's too bad because there's a way."

The team-type sports over-emphasized in high schools teachers ought to spend more time with such individual sports as bowling, golf and jogging. In sports a person can be taught skills and then could progress on their own rate with periodic help from an instructor.

School hours are a slow-bowling alleys and golf. Arrangements could be worked out for classes wishing to use these facilities.

A person would then be only against himself and would be responsible for the success or failure of his own team.

There is another advantage taught in sports such as bowling for virtually a lifetime. In the hand, the opportunity to participate in organized sports outside of high school sports is more people.

Teenagers have enough problems. The unskilled do not need to be one of being "last." They don't have. There are better alternatives.

—Robert C.

### Course load too heavy Cut out your boob tubing

Some students are burdened by an extremely heavy load this term. No, it's not that they're registered for 18 or 20 units. They may be carrying the standard 16 hours. It's that extra 16 hours of TV viewing per week that's tiring them out.

Take a stroll through the west sector of the Memorial Lounge almost any hour of the day. Students sit, lie, lean (some forward toward the set) with mesmerized gazes affixed upon images wavering in living color, no less. With their oversized ears fastened in place, one almost expects them to simultaneously jump to their feet and sing M-C-K-E-Y . . . It's too bad there isn't an inoculation for televisionitis.

The problem of habitual television viewing was treated in the Ensign's August issue. The article is entitled "Screening Out the Garbage." For many students, leaving their home TV set to return to the university screens out a lot of garbage. Unfortunately,

others bring their portable boom boxes with them. In the article above, Griffin and Adine have a steady diet of television news influence. Television may brainwash us by shaping the way we . . . understand the world people live and act."

This great institution offers courses in the study of how and act throughout the world. The vast new library additions volumes of information on it. What a pity to forsake them, undocumented source—television. Let's tell those students who are free "to act for themselves not to be acted upon." Studying university, ranging from religious freedom to the study of students to shape their own not to be shaped.

The TV audience is more upon."

—Carol

leadership of this country is apparently crucial period in history. And many of those who will be considering aspects candidates which have little to do with the future of the nation or government or legislature—such as face (which is not to say a face how much "something-for-the-future" is involved).

The circumstances which cause abstainers along their course worse, and they, along with the voters, are well told by the. The only question that was unanswered is this: when the of American citizens decide it time to participate once again electoral process, will it be too late?

DONALD G. DAN

### Figure used incorrec

Editor: I wish to call your attention to an error made in your reporting of President Kimball's devotional comments. Your article (9/8) states: "He cited statistics in Lake County which showed 414 marriages, 414 ended in divorce, President Kimball made statement."

What he did say was that in the county in Salt Lake County were 832 marriages, and in the month there were 414 divorces. He did not mean that 414 of the couples were divorced, undivorced in the same month they were married! Clearly there cannot be used to infer the proportion is continually increasing. President Kimball used the figure to illustrate that there are too many divorces occurring.

Dismissing a proportionate demographic survey concerning proportion of marriages which expected to end in divorce, thirty percent in the United States, the proportion is continually increasing. In addition, the divorce rate has increased in most Western nations would be unfortunate if Kimball were credited with an inaccurate perception of divorce patterns because of misreporting of his remarks.

DR. JAMES E. DEPT. OF S.

## Don't judge Mao now

With the passing of a great world leader, there is always the rush to eulogize, characterize, criticize and generalize. A little patience would go a long way toward increasing accuracy of accounts and allowing for a more proper perspective.

The death of Mao Tse-tung is an occurrence of such significant magnitude, that only after the passage of time can anyone begin to assess the full impact of that single event. Future generations will have to judge the greatest and most powerful communist leader to ever live.

Even now, it can be said he controlled more people under his banner of communism than any other man. Such power and control has been, and is, treated with contempt by the

democratic society of America. It is completely foreign to the ideological climate of a freedom-loving people. It is that the basis by which the success of Mao Tse-tung should be judged? Is he to be assailed as a ruthless tyrant by democracies, and hailed as a great leader by those countries at the other end of the political spectrum? Mao's life and the impact he has on the world cannot be packaged that concisely or in such simplistic form.

It's not that Mao is a great leader, a communist empire, but rather a leader leading that empire? For the past thirty years, he has been leading that quarter of the world's population toward better living conditions, economic prosperity, industrial modernization and world prominence.

For the last four years, Mao has been leading that empire toward a more friendly relationship with the United States. It was only through his personal influence that so many Americans have recently been able to visit and enjoy that foreign land, and that many of his people have been allowed to visit the United States.

Too little is yet known about Mao's life and the final effects of that life are still to come. This is not the time to judge that life, but to simply acknowledge that it had an unfathomable impact in the course of human events. Because of that impact, it would be of benefit to the world if the life of Mao Tse-tung were someday judged, in the proper perspective, to be a good one.

—Alan D. Berbert
